GGD filters are part of Critical Process Filtration’s economical, general service product line that can be used to lower the total cost of filtration from simple to the most complex applications. Produced using the same quality materials and manufacturing excellence as our other product lines, you can be assured of their performance, dependability and scalability. While general service filters are not integrity tested or validated for retention, these highly efficient filters remove large amounts of contaminants early in the process to reduce the load on your expensive downstream filters. They are also useful as stand-alone clarifying or particle removal filters in less critical applications.

GGD cartridge and capsule filters are constructed with fiberglass depth media for clarification and prefiltration of liquids and gases. Pore sizes range from 0.22 to 10 µm. GGD filters are capable of retaining large amounts of particulates and contaminants which translates to longer filter life and lower costs.

Critical Process provides unrivaled delivery times, technical consulting before purchasing, and very competitively priced high-performance products. Our comprehensive testing & analysis and validation services support your team whenever they need it. Your process experts partnering with our filtration experts is how we deliver your company’s solution right the first time.

GGD filters are recommended for the clarification & prefiltration of:
- Chemicals
- Acids & Bases
- Inks & Dyes
- Process Water
- Air & Gases

Clarification & Prefiltration

Particle Filtration

**CARTRIDGES** – Nominal Dimensions
Length: 5 to 40 in. (12.7 to 101.6 cm)
Outside Diameter: 2.75 in. (7.0 cm)

**CAPSULES** – Nominal Dimensions
Length: 2 to 30 in. (5.1 to 76.2 cm)
Outside Diameter: 3.50 in. (8.9 cm)
Critical Process Filtration, Inc.       2

Filtration Area

| Length | 2" | 5" | 10" | 20" | 30" | 40"
|--------|----|----|-----|-----|-----|-----
| Area   | 5.08cm | 12.7cm | 25.4cm | 50.8cm | 76.2cm | 101.6cm
| Area   | 0.8 ft² | 2.3 ft² | 5.0 ft² | 10.0 ft² | 15.0 ft² | 20.0 ft²

Extractables

GGD filters typically exhibit low levels of non-volatile residues.

Non-Fiber Releasing

The GGD filters comply with Title 21 CFR sections 210.3 (b)(6) and 211.72, for non-fiber releasing filters.

FDA and EC Compliance

Materials meet the requirements listed by the FDA as appropriate for use in articles intended for repeated food contact as specified in Title 21 CFR sections 174.5, 177.1500, 177.1520, 177.1630, 177.2440, and 177.2600 as applicable. All materials used to make the filters are listed in European Commission Regulation EU/10/2011, Annex 1.
Flow rates for Cartridge filters are per 10-inch length. The test fluid is water at ambient temperature.

Flow rates for Capsule filters are tested using a 2” capsule filter with 1” sanitary inlet and outlet ports. The test fluid is water at ambient temperature. Flow rates for larger capsules will scale with filtration area. Rates will vary based on end configuration of the capsule.
GGD Filters Ordering Information

Fill in the corresponding codes in the boxes below to build your Part Number.
